## **ORCA-MAT:**

## **Properties**

- ORCA-MAT is a low density, non woven continuous strand laminate bulker print control mat containing approximately 45% by volume of microballoons and having a density of 0.045 G/cm<sup>2</sup>
- ORCA-MAT has excellent wet-out property for unsaturated polyester resins and absorbs about 55% by volume of the resin
- No change of thickness is observed even after the resin has been cured

## **Packaging**

Each individual roll is wound on a paper core and wrapped with clear polyethylene film.

## **Storage**

ORCA-MAT should be stored dry in its original packaging, in a well ventilated area away from direct light. Rolls must be stored vertically, as horizontal storage or piling might affect thickness.
